

Drainage Area: CI, VPU: 21 - Release Notes

05/10/2016 – Updated Components

The improved HUC12 downstream pointers from the February 2016 WBD Version were updated in the NHDPlus WBDSnapshot. When a correspondence between the two versions could be determined for both the HUC12 and the downstream HUC12, the downstream pointer was updated.

11/18/2015 – Updated Components

The NHDSnapshot was revised to delete the contents of NHDPointEventFC (VPU 21 point events for gages can be found in the NHDPlusV2 National GageLoc file).

EROM was re-run for Puerto Rico due to the addition of network locations for more stream flow gages.

07082015 – Updated Components

The WBDSnapshot was revised to correct the values in the Acres field.

12302014 – Initial Release

The EROMExtension was enhanced for mean annual flow estimates in Puerto Rico. See Appendix A of the “NHDPlus V2 User Guide” for a detailed explanation of the EROM processing.

There are no EROM flow estimates for the U.S. Virgin Islands due to lack of input data.
